Objectives

My goals are to design a website, brand, graphics, that is simple and clean. Have fun designing for the company and the clients. I would like for my designs to be usable by clients. I would like to build relationships with the clients and end users to achieve a better design.

Experience

Hideaway Pizza

Server

June 2020 August 2021

Took customers orders. Worked with the customers and the managers to solve problems. Helped other employees to guarantee the customer have the best experience and pizza we could offer them.

Mazzio's

Front of House Staff

June 2019 August 2020

Took customers orders. Worked with the customers and the managers to solve problems. Helped other employees to guarantee the customer could have the best experience and pizza we could offer them.

Chuy's

Greeter

June 2017 August 2017

Greeting customers and seating the at the tables. Helped other employees to guarantee the customer have the best experience we could offer them.

Hideaway Pizza

Support

June 2014 August 2017

Bussed tables and gave customers what they asked for or looked like they needed. Helped other employees to guarantee the customer have the best experience and pizza we could offer them.

Design Philosophy

Solve intricate creative challenges through analyzation of the problem. To come up with a visual that is aesthetically pleasing, yet still communicating a clear and concise message. Visually interpreting the world through the eye of a designer. Putting together any combination of images, type, video, color, and more to create messages that make an aesthetically balanced world. Creatively solving design problems to imagine and structure the future of design.
